

1977 EDITORIAL INDEX

This index of articles appearing in MHE in 1977 is arranged by function. Articles are listed alphabetically under each function category.

The month of publication and opening page number are given for each article. ("13th" indicates that the article appeared in MHE's special Spring issue on powered mobile equipment. "14th" indicates the special Fall issue on packaging/material handling interaction.)

Note that each article is preceded by a code key. This code key can be used in conjunction with an Index by Product (see page 161) to find articles which cover specific products. Additionally we have listed all titles of Editorials, columns on Computers/Controls/Systems, and Packaging/MH Interaction on page 161.

Index according to products

MHE's 1977 articles are listed here according to product classification. In this case, a code key is used rather than listing each title. This code key—A-1, B-2, C-3, etc.—refers to the matching code key which precedes each article listed in this section.

For instance, the first article under "High-rise storage and retrieval systems" has code key A-3 which refers to a matching code key on page 159. This code key precedes an article title and the month of publication and page number for that article.
